Projects

PROJECT I

Text Scanner- A Text Recognition App

Android App using Java, Firebase ML kit

Text Scanner is able to detect text from any image in the most efficient and convenient way. In this app I used Firebase ML Kit.

PROJECT II

Notes - A simple Note Taking App

Android App using Java, Room DB, MVVM

Notes app is a good helper to manage your schedules and notes. It is built using Room database and MVVM design pattern.

PROJECT III

CryptoCalc

Android App using Java

To convert plain text into cipher text using different cryptography algorithms. Users can also set the key of their choice.

PROJECT IV

Food Set Go

Food delivery App using Firebase Database

Food Set Go is basically an food Delivery app developed using Android Studio (JAVA) and Firebase.

PROJECT V

MoodTunes

Python Project

MoodTune is complete python application that plays the music based on users' facial expression.

PROJECT VI

Weather App

Weather App using Flutter

This can provide accurate and detailed weather forecast information, including hourly, daily and weekly weather forecasts
